

Clinical Training Application Guide

Thank you for your interest in training with Midwest Access Project (MAP). MAP is a nonprofit organization based in Chicago, IL. MAP works with medical students, nursing students, residents, advanced practice clinicians, and licensed physicians to coordinate reproductive health training rotations to meet the individual needs of each trainee. MAP is not a health center or clinical site and does not provide any direct patient care. MAP works with a network of providers throughout the Midwest to coordinate and provide training rotations to MAP trainees.

Applications must be submitted online by midnight Monday, July 15, 2019. All applicants will be notified on Monday, July 29, 2019 about whether they have been selected for training. Please contact MAP's Program Director Kristie Monast at kmonast@midwestaccessproject.org or (773) 944-0594 with questions.

Helpful Tips:

- * If you can only participate in MAP's clinical training with the permission of your program, please obtain that permission prior to submitting an online application.
- * MAP can only offer hands-on clinical training in procedures that fall within your healthcare profession's scope of practice as defined by state law where you train.¹ In addition, MAP trainees must come with or purchase malpractice insurance to receive hands-on clinical training.
- * The online clinical training application will require approximately 30 minutes to complete. Since applications cannot be closed and saved for later revisions, please be prepared to complete the entire application in one session. Save a copy of your completed application in the event you choose to reapply for a future application cycle. Below are application questions you may want to prepare before starting the application online:

Q What is your primary interest or reason for seeking training with MAP? (1000 characters max)

Q Identify up to three goals you want to accomplish during this training rotation, being as specific as possible.

Q As you envision providing Sexual/Reproductive Health (SRH) care in your clinical practice, where do you see yourself providing these services? Please describe the geographic location (state(s) and urban/suburban/rural), the care setting, whether other SRH services and/or providers are in that area, and the impact your practice would have on that community. Would you live in that community or travel in to provide care? (2000 characters max)

Q Would you like to say more about your plans, your commitment to SRH care, or details about how you plan to integrate SRH into your future work? Do you envision any obstacles to integrating SRH into your work? How might you overcome them? (1000 characters max)

Q When would you like to do your clinical training? You will be able to provide up to three options.

Q If you will have other clinical or educational obligations during the rotation, please explain. (200 characters max)

Q Midwest Access Project has training opportunities in Illinois (Chicago, Peoria, and Granite City), Minnesota (Minneapolis), and Nebraska (Bellevue). You will be asked to rank your preferred training location, with the option to select N/A if you would not be able to travel to a specific location.
